Small and Medium Business Specialised

Aerohive

Aerohive's cooperative control wireless LAN architecture eliminates wireless LAN controllers, providing all the management, mobility, and security of controller-based architectures without the cost, capacity, performance and availability issues associated with controller deployments. In addition, Aerohive solutions provide the reliability and scalability necessary for mission-critical networks and are optimized for voice over wireless LAN (VoWLAN) applications.

Aeroscout

AeroScout is the Industry's Leading Provider of Unified Asset Visibility Solutions for Healthcare, Manufacturing, Logistics and Other Industries. AeroScout solutions use WiFi based Active RFID, sensors, RTLS and other technologies to provide complete wireless asset tracking and monitoring. As a pioneer in the WiFi RFID market, AeroScout's solutions are used by hundreds of customers worldwide in healthcare, manufacturing, logistics and other industries to automate business processes and deliver context-aware applications. By operating over popular wireless data communications standards, AeroScout's solutions add minimal incremental cost to a communications network and enable a broad set of visibility applications. Many top companies and organisations, such as Boeing, DHL, Freescale Semiconductor, City Link UK, and over 200 hospitals worldwide have deployed AeroScout's WiFi RFID technology. The company has been recognised for its innovative products by top publications, leading analysts and has received major industry awards.

Vocera

Vocera enhances business productivity, teamwork, and service levels by enabling fluid, instant voice communication among team members, across groups, and throughout an organisation of mobile professionals.

Vocera's hands-free, 802.11b/g wireless solution provides a cost-effective, easy-to-use system for instant voice communication in hospitals, retail stores, and other building and campus environments. There's no need to remember phone numbers. Simply say the name, title, or function of the person you need to reach and Vocera connects you instantly to the people and information you need.
